PNEUMATIC BARREL PUMPS (DRUM PUMP)

We produce and supply Air Operated Barrel Pump Pumps which are also commonly known as Pneumatic Barrel Pumps or maintenance free barrel Pumps operates employing a unique pumping principle. Barrel pump is useful for safe and efficient handling of highly corrosive chemicals, solvents, acids, petroleum products diesel oil ,and fuel oils , plating solution , toxic chemicals etc.

It Eliminate danger of spillage explosion hazard. Construction of Pump is such that operating compressed air in contact with pumped liquid. The pump can be directly inserted in to the barrel threading provide on the pump adopter. It sucks the liquid from the bottom and hence less chances of leftover material. It does not have any type of motor and hence virtually zero maintenance.

FEATURES :-

- Operates on Air of 4 to 6 Kg/Cm².
- Adjustable flow rate.
- Easy to lubricate.
- Self Priming and Easy to maintain
- Light weight.

Technical Data

Capacity	80 Lpm.
Head	15 Mtrs.
Operating Pressure	3 to 6 kg/cm ²
Material of construction	S.S.304 / 316
Discharge	1 Inch
Temperature	120° C
