BARREL PUMPS (Motorized)

We are a producer and supplier company of different types of Industrial Pumps. We offer different types of Barrel Pumps in a wide range. These pumps are made of stainless steel SS-316/ Aluminium / PP / and PVDF motorized Barrel pumps used for emptying the Barrel.

This Barrel Pumps are portable pumps, suitable for standard barrels emptying process, with small size, and light weight. Barrel Pumps are used for Barrel unloading and transferring Low/High various liquids. The advanced and technically simple construction of the pumps assures an efficient and reliable operation coupled with easy strip down maintenance

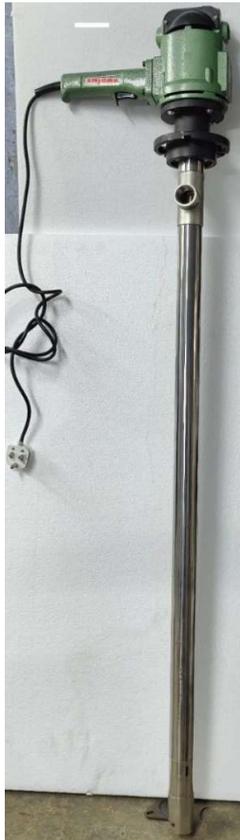

FEATURES

Pumps for Safe operations
Light Weight, Portable Use
Saves Considerable Time and Labour

Seal less Design
Modular Design Construction for Easy Maintenance
High Quality and Reliable Performance

Suitable for Handling Aggressive, Corrosive & Flammable Liquids. Screw type and Piston type Barrel Pumps are also available with us for handling thick type liquids

SS-316

PP / PVDF

WITH FLP MOTOR
